

apply and further develop Marxism-Leninism has been provided by the Communist Party of China which has brought about great revolutionary transformations in its country, writing it into a single, great, peace-loving state which has embarked upon the all-round development of its economy and culture."

"... the Communist and Workers' Parties are more and more closely rallying the working people of all countries beneath the triumphant banner of Marx-Engels-Lenin-Stalin."

(Exhibit E. p. 1, cols. 102)

The PSP edition of Reproductions from the Cominform Journal contains

the following teachings:

1. The Revolutionary Character of the CPSU: the Most Powerful and Authoritative Characteristic Communist Party in the World, the Great Model and Inspiring Example for all Communist Parties.

"From the very outset of his revolutionary activity V. I. Lenin fought for the creation of an organized, closely united and monolithic party, the party of the new type, the party of social revolution and the dictatorship of the proletariat. ..."

"The vast experience of the Communist Party of the Soviet Union is indeed, of inestimable international significance. The Communist Party of the Soviet Union is the most powerful and authoritative Communist Party in the world, the great model and inspiring example for all Communist and Workers' Parties."

(Exhibit C. p. 3, col. 1)

2. Leninism, a Ideological Weapon of all Communist Parties, is the Generalization of the Experience of the Proletariat in the Struggle for the Overthrow of the Capitalist System.

"Leninism is the great international teaching of the working people of the world, a powerful ideological weapon of the Communist and Workers' Parties of all lands. Lenin's ideas exert a tremendous influence on the whole course of world history, they set in motion the broad masses of the working people in all parts of the world, unite and rally them in the struggle for peace and freedom, for democracy and Socialism, for the triumph of a new life."

(Exhibit C. p. 1, col. 1)

"... Leninism--Marxism of the new epoch, the epoch of imperialism and proletarian revolutions--is the property of toiling mankind. Taking hold of the masses, the Lenin ideas have become a powerful material force transforming the world. Leninism is a genuinely scientific theory of social development, closely linked with the practice of the world Communist movement; it is the generalization of the vast experience of the proletariat in its struggle for the overthrow of the capitalist system and for the building of a new, socialist society."

(Exhibit C. p. 1, col. 1)

C-5

3. Communist Revolution in China, Vivid Embodiment
of Leninism as Applied to Concrete Conditions,
Shows The Way To Accomplish Such a Revolution.

"The victory of the people's revolution in China is a vivid embodiment of the ideas of Leninism as applied to concrete conditions in China....."

(Exhibit , p. 1, col. 1)

"The Chinese people's revolution and the achievements of the Chinese People's republic, won under the leadership of the Chinese Communist Party, have shown the way to build the united national front of the working class, the peasantry, the intellectuals and the urban petty bourgeoisie, and the national bourgeoisie, for the victory of the democratic, anti-feudal, anti-imperialist revolution, and for the establishment of the new type of state of people's democracy upon this basis."

p. 6, cols. 2-3)

4. United States: Heads all the Forces of
Reaction and War. In Hitlerite Fashion, Prepares World
War of Mass Destruction Behind Banner of
Anti-Communism.

"In our day, all the forces of reaction and war, headed by the U.S. aggressive circles, gather beneath the banner of anti-Communism in their struggle against all that is new and progressive. But the peoples throughout the world remember and will always remember that it was precisely under this criminal standard that the second world war was prepared by the Hitler fascists--the shock force of predatory German imperialism."

"On whom do the U.S. warmongers rely? In Europe they rely on the West German militarists and revenge-seekers, on the anti-patriotic forces of the ruling circles of Britain, France, Italy and the other West European countries; in Asia the U.S. militarists rely on adventurists and betrayers such as Syngman Rhee, Chiang Kai-shek and Bao Dai; in the countries of Latin America on anti-popular pro-fascist elements. It is these forces of reaction that are coming out today beneath the standard of anti-Communism and, supporting the U.S. 'positions of strength' policy--the policy of gambles and atomic blackmail--are striving to plunge the new peoples, into the abyss of a new world war."

(Exhibit , p. 1, col. 2)

C-6

"Peace-loving people throughout the world cannot but feel strong concern and wrath at the intensified intrigues of aggressive circles of the U. S. A. and other Western states to sharpen international tension, to prepare and let loose another war, a war in which such means of mass destruction as the atomic and hydrogen weapons would be used. The world public learned with indignation that the recent session of the aggressive NATO Council in Paris had sanctioned the preparations of plans for an atomic war in Europe and in fact given the American generals the 'right' to decide, at their own discretion, where and when the A-bomb would be used.

"At the same time the ruling circles of the U. S. A. and Britain, in defiance of the will of the peoples, are doing their utmost to impose on the West European countries the London and Paris agreements designed to revive West German militarism and restore the German Wehrmacht under the command of former Hitler generals. Moreover, the ruling circles of the Western powers intend, through the medium of these agreements, to place atomic weapons in the hands of the Hitler butchers who during the second world war acquired experience and skill in the murder of civilians and merciless destruction of towns and villages.

"Nor can the world public pass over the fact that the recent 'State of the Union' message of the U. S. President contained a direct intimation that the U. S. A. will continue with its policy of stepping up the arms drive, laying the main emphasis on the use of 'new weapons, especially those of a rapid, and destructive striking power, i. e., weapons of mass extermination.

"The noisy and pernicious atom hysteria whipped up in the bourgeois press, with encouragement from official circles, hysteria which today has assumed tremendous proportions, is aimed at inducing the ordinary peoples of all countries to resign themselves to the thought of an atomic war, to believe in the 'legitimacy' of the use of the atom and hydrogen bombs. In their hope of enmeshing the peoples in lies, the advocates of an atomic war are lavishly peppering their warmongering pronouncements with hypocritical phrases about the 'defence' of the so-called free world, about the 'danger' emanating from the Soviet Union and the other countries of the socialist camp. ..."
